Comments: I am disheartened to learn that, in its 10 years of existence, ICCVAM has approved only one non-animal test method. This is not because there are no non-animal test methods - on the contrary, ICCVAM's European counterpart has approved dozens of non-animal test methods.

Animals are suffering needlessly and public health is being jeopardized. Please, I urge you to accept internationally validated non-animal methods, including non-animal test methods for skin and eye irritation, phototoxicity, and pyrogenicity. Thank you kindly for your sincere consideration.
