Subject: Alternate methods to Draize test

Dear William Stokes,

I would like to urge you to recommend federal agencies begin accepting alternate methods to the Draize test that have been proven useful. I am in favor of moving forward with recommended improvements without delaying acceptance of the alternate tests in their current forms. Ideally, I would like to see the current efforts eventually transcended by methods that substitute non-animal testing for the Draize and other tests.

Thank you for your time.

Carol Frith
